RELEVANT EXPERIENCE

Full Stack Development & QA Intern – AICE Xpert

Feb 2026 – July 2026

- Developing SAMCard, a full-stack digital business card using React.js, Node.js/Express, and MongoDB with JWT authentication and QR code verification
- Handled end-to-end development – from REST API design and database schema to frontend and deployment
- Documented and resolved 150+ bugs across the card editor through formal QA reporting, covering validation, behavioral, and UI defects

IT Intern – Malik International Organization

June 2024 – August 2024

- Assisted with basic IT support, system updates, and troubleshooting
- Supported internal teams in managing digital tools and platforms

Content Writing & Project Management Intern – Buzz Interactive

Jan 2023 – March 2023

- Researched and wrote SEO-friendly articles and blog posts on tech and digital marketing topics
 - Assisted in managing the content calendar by tracking task progress and following up with team members
-

CERTIFICATIONS AND PROJECTS

- ResuFlow – AI-Powered CV-to-Portfolio Generator (React, TypeScript, Next.js, Node.js/Express, Vercel)**
 - Built a full-stack tool that parses a CV/LinkedIn profile and auto-generates a deployable personal portfolio site.
 - Converted multiple static portfolio templates into dynamic, data-driven components within a templates monorepo, deployed via Vercel.
 - MEDIFY – Hospital Management App (Java, XML)**
 - Full-stack hospital management system with three dedicated portals – patient, doctor, and admin – covering registration, appointment scheduling & rescheduling, doctor assignment, and hospital/department browsing.
 - Integrated the Gemini API to power an in-app AI chat feature, alongside core patient features like doctor search, hospital profiles with department listings, and a blood donation module.
 - Vision Transformers for Breast Cancer Histopathology Classification**
 - Implemented and benchmarked three transformer architectures – BEiT, MaxViT, CoAtNet – for breast cancer histopathology classification on the BreakHis dataset across four magnification levels.
 - Best result: BEiT achieved 94.10% accuracy and 0.9854 AUC-ROC at 40X, with CoAtNet-0 close behind (93.83%) and offering the fastest inference.
 - Movie Watchlist Management System (React, Node.js, Express, SQL)**
 - Full-stack web app for searching, adding, and managing a personal movie watchlist, persistent relational database.
 - REST API built in Node.js/Express handling CRUD operations, with a dynamic React frontend and state management.
 - Google IT Support Professional Certificate – Coursera**
 - Completed a 6-course certification covering networking, OS and IT security fundamentals via practical labs.
 - Gained hands-on exposure to troubleshooting workflows, cloud infrastructure basics, and customer support
-

SKILLS

- Languages:** C++, Python, JavaScript, TypeScript, HTML/CSS, SQL, Assembly
- Frameworks/Libraries:** React.js, Node.js, Express.js, Next.js
- Databases & Tools:** MongoDB, PostgreSQL, Supabase, SQL Server, Git/GitHub, REST APIs, Tailwind CSS, AWS, Vercel, Canva
- Soft Skills:** Communication, Teamwork, Presentation
